ITERATION - 9

System Documentation - This iteration has the collated system documentation of the final versions of all system design documentation of the ByteXpress E-commerce system.

The meticulously compiled documents consist of the updated requirements lists, complexity matrix, logical and technical narratives, technical primitive, UML activity, sequence and state diagrams as well as the test cases and screen designs for all the use cases.

Client Information - Jannes Janse van Rensburg is the co-owner of Natuurlik. He is currently working as a Business Area Manager for DSV - Global Transport and Logistics.

Figure 5- VAT State Diagram.....	6
Figure 6 - Reseller Return Time State Diagram.....	7

1. Iteration Introduction

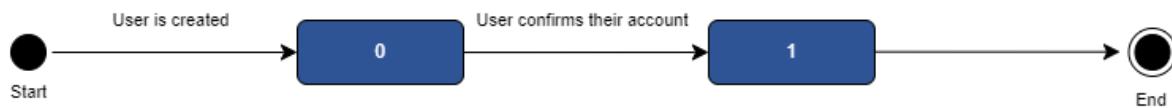

For this iteration the ByteXpress team have compiled a document that illustrates the collated system documentation of the final versions of all system design documentation for the ByteXpress E-commerce system.

2. State Diagrams

Introduction

In this section, the ByteXpress team modelled state diagrams for the following classes, the order class, the order query class, the payment class, the reseller payment settlement class, and the VAT class. These classes change based on activities carried out on the system.

2.1. Administrative Subsystem

2.2. Order Subsystem

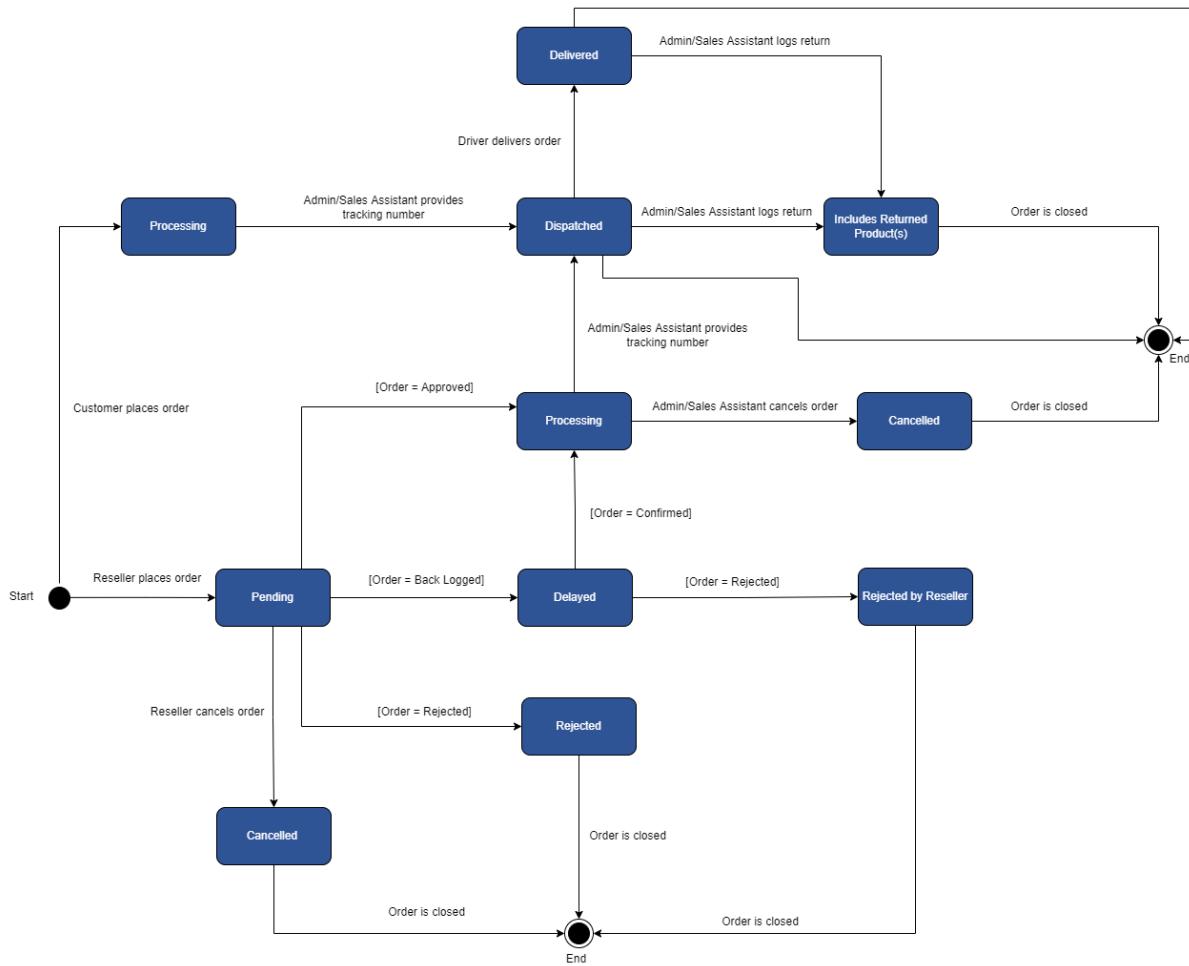

Figure 1 - Order State Diagram

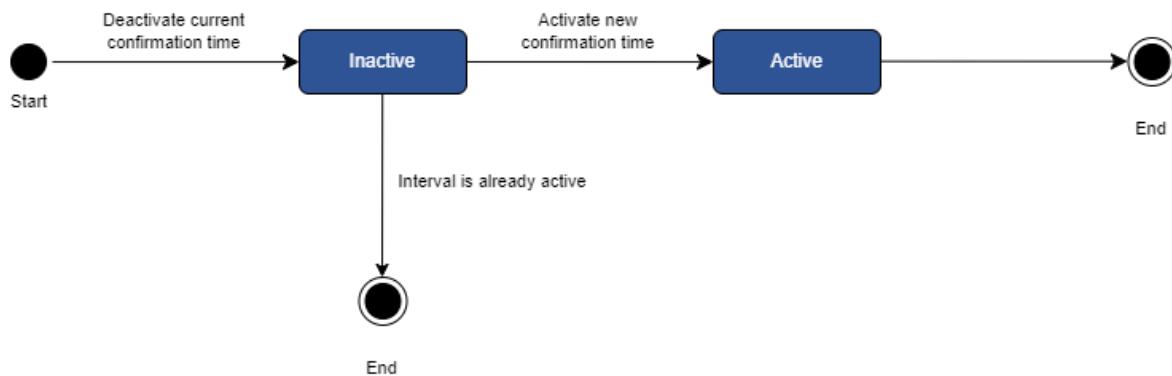

Figure 2 - Order Confirmation Time State Diagram

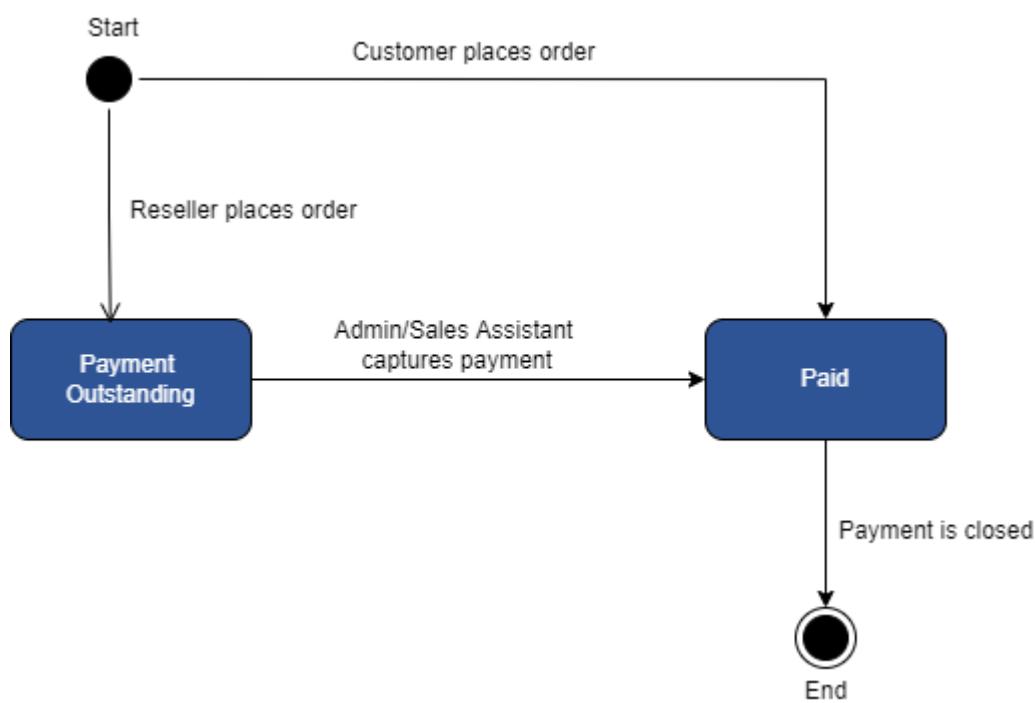

Figure 3 - Payment State Diagram

2.3. Query Reason Subsystem

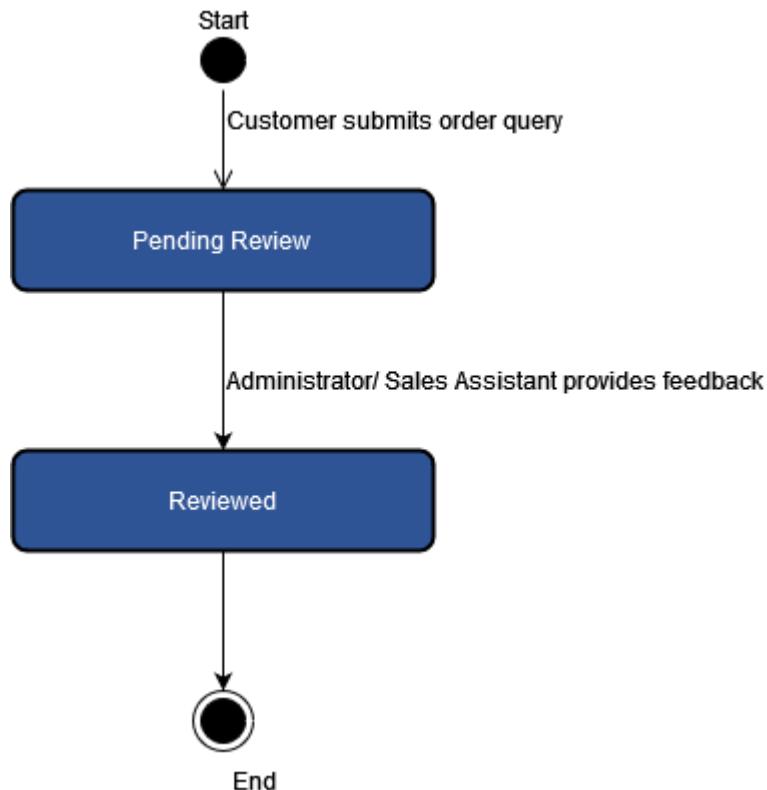

Figure 4 - Order Query State Diagram

2.4. VAT Subsystem

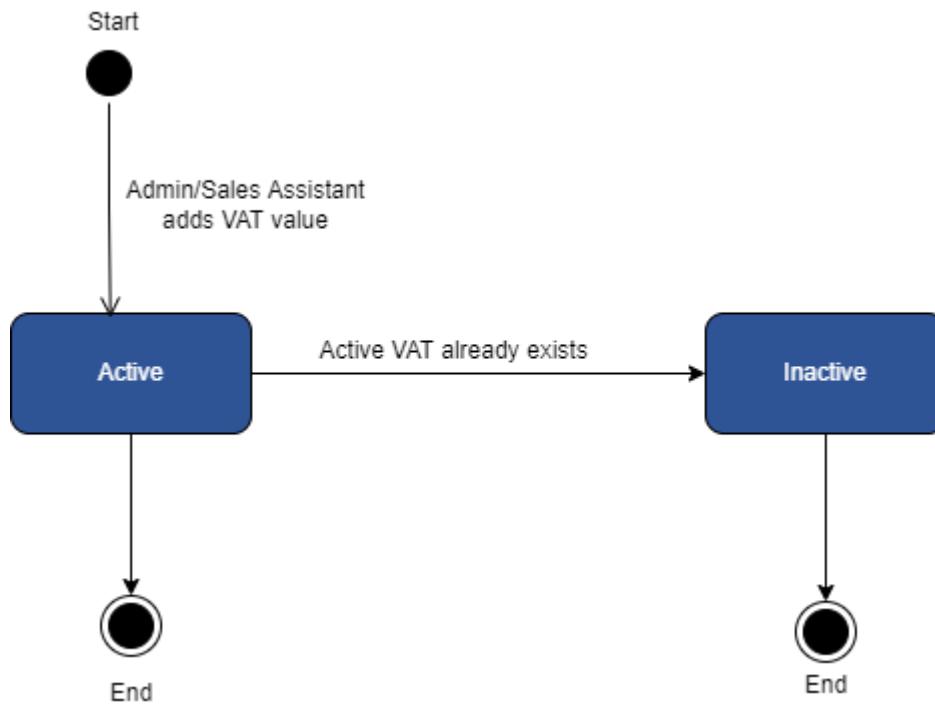

Figure 5- VAT State Diagram

2.5. Reseller Credit Settlement Time Subsystem

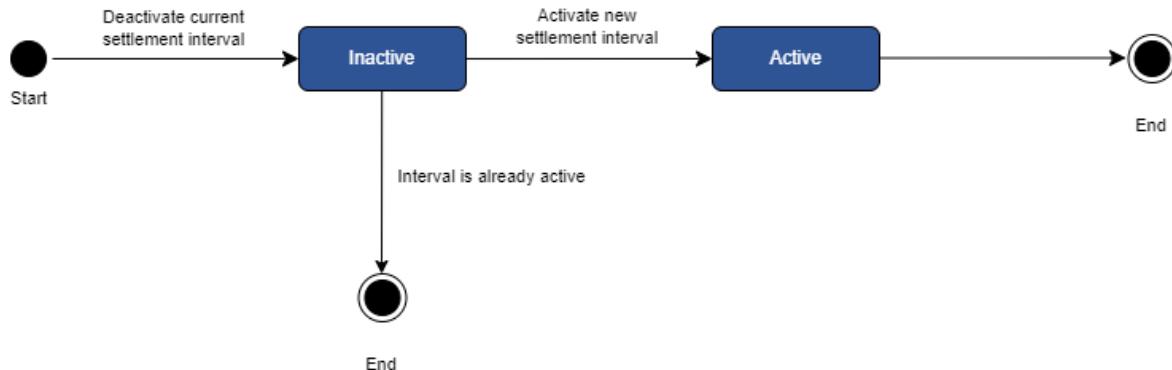

Figure 6 - Reseller Return Time State Diagram

Conclusion

This concludes the state diagrams modelled for the order class, the order query class, the payment class, the reseller payment settlement class, and the VAT class.

3. Iteration Conclusion

In conclusion the compiled iteration detailed the final documentation for the design and development of the ByteXecom E-commerce system. The documents contained the updated requirements lists, complexity matrix, logical and technical narratives, technical primitive, UML activity, sequence and state diagrams as well as the test cases and screen designs for our use cases.
